Deep Fake Neighbour Wars

Deep Fake Neighbour Wars is a new comedy impressions show dropping on ITVX in January 2023.

Produced by Tiger Aspect, part of Banijay UK, the 6x30' series is the world's first long form narrative show that uses Deep Fake technology. It uses the very latest in AI technology to turn the UK's best new impressionists into the world's most famous celebrities – only here they are ordinary people who happen to be embroiled in petty silly neighbour disputes.
